

**AMENDMENTS TO THE CLAIMS:**

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Currently Amended) A folded disposable diaper, comprising:

a diaper main body having a front abdomen portion, a back portion, and a crotch portion interconnecting the front abdomen portion and the back portion;

said crotch portion having opposing side edges formed as leg hole sections which are between the abdomen portion and the back portion, said crotch portion extending widthwise between said leg hole sections;

the front abdomen portion having opposing abdomen side edges and the back portion having opposing back side edges, said abdomen side edges being respectively joined to corresponding ones of the back side edges to define a waist opening;

said diaper main body being provided with an absorbent main body at the crotch portion;

waist elastic members attached in an expanded state in a diaper width direction to parts of the front abdomen portion and to parts of the back portion extending along the waist opening;

a leg-hole elastic member attached in an expanded state along each of the leg holes sections;

the diaper main body having ~~a display part on which is provided information including~~ indicia indicating a size of the diaper main body and/or indicating a side of the front abdomin portion or the back portion;

said diaper main body being folded over at a fold so as to define a first diaper body portion on one side of the fold and a second diaper body portion on another side of the fold, said first and second diaper body portions being overlaid flat on each other, ~~[[and]]~~ said fold defining a fold edge face between said first and second diaper body portions, said fold edge face being exposed and facing outward in a direction substantially parallel to first and second planes of said first and second diaper body portions, at least a portion of said ~~display part~~ indicia being disposed on said fold edge face, said at least a portion of said ~~display part including~~ indicia indicating said size of said diaper main body such that said size is being viewable when two or more like folded diaper main bodies are stacked on one another with all said first and second planes of said like folded diaper main bodies parallel each other;

said indicia also being disposed on, and extended to, both the first diaper body portion and the second diaper portion; and

said fold extending widthwise across the crotch portion.

2-5. (Cancelled)

6. (Currently amended) The folded disposable diaper according to claim 1, wherein said leg-hole elastic members are disposed so as ~~[[to]]~~ not to extend into an area in ~~said display part whereat~~ which said ~~information~~ indicia is provided.

7-9. (Cancelled)

10. (Currently amended) The folded disposable diaper according to claim 1, wherein the indicia ~~[[size]]~~ is printed on the ~~display part of the~~ diaper main body by means of an ink-jet system.

11. (Currently amended) An assemblage of diapers wherein said diapers are a plurality of said folded disposable diaper of claim 1, said diapers being stacked on one another in a stack with all said first and second planes of said diapers parallel to each other, and said ~~indicia indicating said size of said diaper main bodies of said~~ indicia being viewable from a side of said stack.

12. (Currently amended) The folded disposable diaper according to claim 1, ~~wherein~~ wherein said leg-hole elastic member of each of said leg hole sections includes two discontinuous sections with a break area therebetween such that said ~~display part~~ indicia is disposed at least in part in said break area and is absent presence of said leg-hole elastic member said information is provided.
